BIN*RITE*™
GRAIN IDENTIFICATION SYSTEM

Prevent mixed grain
PROTECT
YOUR
OPERATION

GSI Take control.

THE SMARTEST WAY TO **ELIMINATE THE STRESS** OF MIXED GRAIN.

Accidentally mixing grain can be a costly problem. Add GSI BinRite Identification to your site automation system to help prevent it.

99% Accuracy

Advanced sensors analyze hundreds of images per second to identify corn, soybeans and red wheat with 99% accuracy.

It never stops learning

BinRite uses the power of artificial intelligence and machine learning to improve over time.

Protect your entire system

BinRite can be mounted in specific positions in multiple locations throughout your conveying system to verify the correct grain is being sent to each bin.

Contact your GSI sales representative for more information.
